

LIT FIRE AND IT DRENCHED HIM

A night-shift worker who tried to warm himself by a home-made brazier last night had to be rescued drenched and shivering, by the Footscray Fire Brigade.

He was working in the chisel-room of the Wiltshire File Co. Pty. Ltd. Sunshine Road, Tottenham, last night and started a fire in a 44-gallon drum.

The heat set off the sprinkler system which sprayed the room and set off the alarm.

The fire brigade arrived a few minutes later and turned off the water.
